THEN READ ON

What TRAIN IT Online Offers Employers…

Proven track record of successfully preparing students for competitive access to Information Technology careers;

Emphasis on the acquisition of lifelong learning skills critical to job retention;

Student skills development validated by industry standard certifications;

Access to a qualified team of experts from Woodrow Wilson Rehabilitation Center (WWRC) for the identification of potential workplace accommodations and assistive technology;

Continued access to TRAIN IT Online resources for students after completion for additional skills development.

What is TRAIN IT Online?

An Innovative Information Technology (IT) program driven by industry standards that can be tailored to meet specialized competencies required for a given business. Companies can meet their business goals and objectives by selecting qualified applicants from this program.

What Educational Tracks are Available?

- **Microsoft Office Specialist**
- **Computer Support Specialist**
- **Desktop Support Technician**
- **Project Manager Professional**
- **Web Applications Developer**
- **Systems & Network Administrator**
- **Help Desk Technician**

Additional Enhancement Courses are available for students who successfully complete their program. Enhancement courses do not have additional tuition charges but may require additional books and exam fees. Coursework is scheduled so that students complete training and take certification exams within one year.

What You Can Do

- *Identify employment opportunities for TRAIN IT Online graduates in your workplace or in other companies within your community*

- *Become a mentor and draw on your experience of the IT industry to provide advice and guidance to students during their training*

- *Lend your knowledge of IT and regional employment issues to the TRAIN IT Online Advisory Committee*
